

A website for your business, without the hassle.

I build websites for local small businesses, starting right here in Longmont, CO.

WHAT YOU GET

Your site, done for you

- ✓ I build it, host it, and keep it up to date
- ✓ You just text me changes (hours, prices, photos)
- ✓ Your domain and Google listing fix included
- ✓ Looks great on phones
- ✓ Live in about a week

Monthly hosting & care included: a fast, secure, modern site (Next.js on Cloudflare).

Optional add-ons

AI chat assistant

Answers common customer questions on your site, day or night.

Online booking

Let customers pick a time right from your site.

[Ask about add-ons.](#)

Already use Booksy? Keep it. (or any booking app)

Booksy

handles your bookings.

Google

is how new people find you.

Your own site

ties them together.

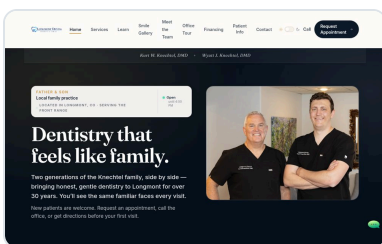

Booksy reviews don't count on Google, so I fix up your Google listing (included) to link to your own site, which helps you show up. Your site shows off your best reviews from both, and Book Now still goes straight to Booksy.

\$79/month

I build it first,
so you see it before you pay.

After your first year, it drops to **\$69/month**.

Or pay \$729 for the full year upfront and save \$219.

RECENT WORK

Longmont Dental website redesign

A clean, mobile-friendly site for a local Longmont practice.

longmont-dental.knechtel.workers.dev

No pressure.
